

## Guidance notes...

This resource pack contains educational materials in the context of animals, animal welfare and pet care. They are especially suitable for Y9 – Y13.

The Teacher Guides and Student Worksheets are written to be used within the Ministry of Education Secondary Curriculum areas of **English**, **Maths**, **Science**, **Social Studies** and **Biology**.

The worksheets are based on commonly kept pets and by using this context students will develop and gain an understanding for the compassionate care of 'living things' in our society.

The future of SPCA Auckland education is to increase the number of secondary schools visiting and utilising The Animal Village as an 'Ultimate Classroom Experience' for the purpose of enhancing studies in various subjects. Not all worksheets require visiting The Animal Village; however, it is a highly recommended field trip where possible.

No fee is charged for the programme; however, donations are greatly appreciated of animal food, gold coin, old towels, blankets and jumpers.

We welcome ideas and suggestions on how we are able to improve resources that are already available, and look to increase the variety of the worksheets available in other subjects. Contact the SPCA Auckland Education Officer regarding feedback on the resources, or for more information regarding the programme.
